

Fleet

Fast & Firm

Fleet® is scientifically formulated with HydrOtechH® to provide turf managers with advanced surfactant technology and turf safety. **Fleet**® was developed to address the symptoms and direct causes of soil water repellency.

Features:

- HYDROTECH® – A novel surfactant technology
- Non-phytotoxic formulation
- Advanced hydrophobic coating remover technology
- Proprietary water conditioning agent

Directions for Use:

Apply 5 - 8 ounces per 1000 ft² in 2 gallons of water per 1000 ft² every 30 days or 2.5 ounces per 1000 ft² every 14 days. Irrigation after application is required to maximize efficacy. Irrigate 0.5 - 1 inch of water depending on the rootzone depth at which even distribution is desired.

HYDROTECH®

HydrOtechH® is a multi-branched surfactant technology with a large poly-branched molecular structure. HydrOtechH® has 6-8 more active sites than many traditional wetting agents. This feature may provide increased performance because of enhanced interaction between surfactant, soil, and water. HydrOtechH® may be less affected by biodegradation than many conventional surfactants and is thereby more likely to provide consistent performance throughout the application interval.

HydrOtechH® has a hydrophobic coating remover that addresses the primary cause of soil water repellency and may provide improved water management efficiency.

HydrOtechH® has a water conditioning agent that buffers tank mix pH and may reduce the negative impacts of soil bicarbonates such as micronutrient unavailability and reduced water infiltration.

ACTIVE INGREDIENT:

100% Polyoxyalkylene polymers with HYDROTECH® (Blend of Multi-Hydroxy polyoxyalkylene polyethers and organic acid correction complex)

Net Contents:
2.5 Gal.
